

Dear Honorable Judge Gorton,

I hope that this letter finds Your Honor well and I thank Your Honor for taking the time to read it.

I hope that Your Honor will find the enclosed diagram from a Boston Globe article called "The Faces of Free Justice" interesting in regards to the government's motion in limine. That being said, one must be very careful about the Globe's coverage of Justice's case because much of it was misleading and some of it was downright wrong. I recommend vetting anything the Globe printed against more reliable sources.

For the topic of the government's motion in limine, I have circled/underlined the relevant parts of the enclosed. However, the Globe failed to note that Professor Pershavitza clearly stated in an interview that the law was clearly on the side of Justice's family. It also doesn't mention on this diagram that Korson was the most senior and best qualified specialist to actually examine Justice and he had diagnosed her with mitochondria more than a year before a comparably much more junior BCH team of non-metabolic geneticists questioned his working diagnosis.

Respectfully Signed And Mailed On March 19th, 2018,

 Martin S. Gottesfeld
